'Earth Kids -Riki & Piki' cartoon series, created by me

'Bubu & Payo' cartoon series for Joongang Newspaper

Why not? :)

A colorful illustration featuring two superhero characters, Riki and Piki, standing on a stylized Earth. Riki is on the left, wearing a green mask and a green superhero suit with a globe emblem. Piki is on the right, wearing a yellow mask and a red superhero suit with a globe emblem. They are surrounded by various icons: a man with a mustache, a doctor, a scientist, a sun, a cloud with rain, and a water drop. Above them, two curved banners read "COLLECT GARBAGE!" in blue and "SAVE THE EARTH!" in green. The background shows a city skyline at night under a starry sky.

'Kiribati in danger' Presentation

Kiribati in danger

- * Kiribati is one of the most vulnerable countries in the world to climate change and sea level rise. This entire country is about to be wiped out by climate change.
- * In some areas, it has already overtaken and if scientists are correct, the ocean will swallow all of Kiribati within next 50 years and perhaps much sooner than that.

Future of Kiribati

- * In 2011, United Nations secretary general Ban Ki-moon visited Kiribati and said "I fear that our children and grandchildren will look back and ask: How is it that they knew what they knew and yet did so little? Climate change is happening and **we must take action now**".
- * Mr. Ban and the president of Kiribati agrees that time is now the scarcest resource in addressing climate change but couldn't come up with a definite plan yet.

'Earth Kids' cartoon was featured on the front page of Chosun newspaper for kids.

이 어린이
웹툰 '지구 꼬마'
연재하는
이쪽 군
어제 신작은

옛날 얼굴의 소년이 원숭이 사르를 하였다. 그라운 앞에 놓인 하얀 종이에 무언가를 그리기 시작했다. 사르가 종이 위를 지나갈 때마다 미법처럼 다양한 행위에 그림이 그려졌다. 환하게 웃으며 이야기를 나누던 조간 진기는 달리 소년의 표정은 사뭇 진지했다. 말없이 그림 그리기에 열중한 지 10여 분이 흡였을 즈음, 종 이 위에 캐리티 하나가 모습을 드러냈다. 소년은 "웹툰 '지구 꼬마'의 주인공 캐리티란 '리키(piki)'라고 설명했다. 이 소년은 바로 환경의 중요성을 웹툰 (Webtoon)을 통해 널리 알리고 있는 이쪽(서울 신동호 씨) 군이다. 지난 18일 오후, 서울 광화문에 있는 소년조선관련실에서 이 군을 만났다.

글·오대일 기자 사진·임동우 기자

**리키·피키 캐릭터로 재미있게 표현
“게임으로도 환경 중요성 알릴래요”**

○웹로그 통해 웹툰 '지구 꼬마' 연재
이쪽 군은 자신의 블로그(www.earthkid.net)에 웹툰 '지구 꼬마(earth kid)'를 연재하고 있다. 지구에 살고 있는 어린이 '리키(piki)'와 '피키(pikey)'가 지구를 오염시키려는 악당들을 물리치 지구를 구한다는 것이 주 내용이다. "제가 어엔피스, 얼굴 같은 해 어로분을 좋아해요. 그래서 어엔피스로부터 영웅분을 자주 그리곤 했죠. 지금 연재하고 있는 지구 꼬마의 경우에는 '메탈 티스(Metal Teeth)"라고 예전에 그렸던 만화에 환경 이야기를 접목시켜 재민생시킨 웹툰이에요."

이 군이 '지구 꼬마' 연재를 시작한 건 지난 2013년 유엔환경프로그램인 유비 플라(UNEP YOUNGO ICC) 회원이 된 이후 자신의 전공을 살려 또래 친구들에게 지구 환경 문제에 관한 중요성을 알리기 위해 만화를 그리기 시작한 것이 개기였다. "엄마가 환경 운동에 관심이 있어서 저 또한 환경 문제를 주제로 간접적으로 참여했어. 그런데 와중에 환경과 관련된 어려운 이션은 보게 됐어요. 너무 어렵고 재미가 없더라고요. 그래서 어린이들이 공감할 수 있는 내용으로 재정 만화를 그려보자고 결심했죠."

○웹툰 그릴 수 있었던 건 같고 딱은 그럴 실력 때문
이쪽 군이 끊어 많이 듣다는 웹툰을 그릴 수 있었었던 건 어린 시절부터 같고 딱은 그림 실력 때문이 가능했다. 부모님과 식사를 하려고 한식당에 들었었는데요. 제가 식탁 위에 놓인 예산판을 뒤집고 거기에 그림을 그렸어요. 그만한 그림 그리는 걸 좋아했나 봐요.(웃음) 그때부터 제 가방엔 그림을 그릴 수 있는 종이와 연필, 친 등을 향상 날고 다녀요."

이 군은 2010년 한국으로 돌아온 이후에도 그림 그리기를 멈추지 않았다. 국내뿐 아니라 'Radiant Peace Art Contest(2012)' 'State Fish Art Con-

[커버스토리] 지구를 지키는 방법, 우리들이 좋아하는 만화에 담아냅니다
교과서 밖에서 꿈 찾는 10대 – 열한 살 환경운동가 이록

“저는 어린이 환경운동가 이록(서울 신동초 5)이라 합니다. 어린이가 환경운동을 하는 게 가능하냐고요? 나이가 무슨 상관인가요. 초등학생이 할 수 있는 일을 하면 되죠.”

저는 주로 제가 잘하는 그림 그리기로 환경운동을 해요. 환경의 중요성을 알리는 그림을 그리고, 멸종위기의 동물에 대한 스티커 보드를 만들어 한강공원을 지나는 시민들에게 알리기도 해요. 환경과 관련한 만화를 블로그에 연재도 해요. 환경과 그림은 제게 있어 빼려야 빼 수 없는 가장 중요한 두 가지예요. 제 꿈은 바로 환경을 생각하는 미술가가 되는 것입니다.”

—환경 문제에 관심이 많아진 계기가 있나요.

“저희 집 근처에 한강시민공원이 있어요. 저는 거기에서 주로 농구를 하거나 스케이트 보드를 타곤 해요. 지난해 어느 날, 평소처럼 한강공원에서 스케이트 보드를 탔다가 음료수를 사러 편의점에 갔을 때였어요. 우연히 편의점 뒤에 있는 쓰레기통을 보게 됐죠. 사람들이 마구 버린 쓰레기가 음식물 쓰레기와 뒤엉켜 있었어요. 거기에 한 무리의 비둘기 떼가 모여 음식물 쓰레기를 먹고 있더군요. 너무 비위생적이고 충격적인 장면이었어요. 왜 사람들은 쓰레기를 아무 곳에나 버릴까요? 음식물 쓰레기와 일반 쓰레기를 잘 구분하지도 않고요. ‘이 쓰레기를 치우지 않는다면 나중에 어떻게 될까?’라고 생각하니 정말 끔찍했어요. 그래서 저는 직접 ‘환경운동가’가 되기로 했어요.”

지구온난화 막아줄 구세주는...‘개미’<美연구>..

▲ 강풀밭을 품기는 물원 음은수목기이니
Elizabeth Cebal ASU

이상기후인상으로 깊어가고 있는 지구의 부정적인 환경변화를 개미가 막아줄 수 있다는 주장이 제기와 함께
의 관심이 집중되고 있다.

미국 과학전문매체 라이브 사이언스(www.livescience.com) 아리조나주립대학 지질학

연구진이 ‘개미가 지구온난화를 막을 수 있다’는 내용의 연구결과를 발표한다고 1일(현지시각) 보도했다.

아리조나주립대학 연구진에 따르면 지구온난화에 존재하는 개미 중 특정 종은 그들의 개미굴에 탄산칼슘(CaCO_3)을 주성분으로 하는 벽돌같은 석회암을 구축하는 속성이 있다. 물미국은 것은 석회암으로 탄산암 성분을 많이 포함해 일부의 형성을 겪을 때 물에 흡수해 지구온난화를 일으키는 주범인 이산화탄소들이 이 탄산암에 의해 흡수된 지하 물질 부분으로 저질된다 것이다. 이산화탄소와 같은 온난화 악기물질이 암 속에 고착화되어 지구 온도가 전보다 낮아질 수 있다는 것이 연구진의 설명이다.

이와 관련해 연구진은 지난 25년간 간도 높은 실증 관찰 실험을 진행해왔다. 그들은 아리조나 카탈리나 산맥 밀다운 백사장
물을 주로 험주 67개 진소에 한주를 가루를 부려놓고 5년 후기로 해당 지역 도입 속 개미들이 어떤 변화를 보이는지
관찰한다. 참고로 미국 남서부 건조지대에는 주로 수목기이(Oecophylla) 등이 서식한다.

결과는 놀라웠다. 해당 지역의 개미들은 해당 강물길 속 밀송과 마그네슘을 선별한 뒤, 개미집 나에 빠른 속도로 석회암을

구축하는 것으로 확인됐기 때문이다. 해당 석회암 계작 속도는 일반적인 자연 형성과정에 비해 약 50~300배 빠른 것으로

조사된다.

The Savior that will stop global warming is...‘Ants’..

The claim that ants can save the negative changes in the environment has been introduced and is getting academic attention. →

Geology researchers in an American science medium have claimed, “Ants can lead to positive changes in the global climate,” on August first. →

According to researchers at Arizona State University, some particular species of ants on Earth are mainly composed of calcium carbonate. The interesting thing is that certain portions of the basement to stone shingles are absorbed by the atmosphere, which is the main factor that causes global warming. The carbon dioxide carbonates are the main culprit when forming material to enrich the soil components such as limestone carbonate. The description of the researchers is that the temperature can be lower than before according to substances that cause global warming getting fixed in the ground.

Researchers have had experimental observations over the past 25 years. They looked for any changes in the soil ants of the Catalina Mountains area of Arizona and Texas by putting the basalt powder spray on six different places. The Rich harvester (*Oecophylla smaragdina*) species inhabit in the

and southwestern United States.

The result was surprising. The reason was that the ants in the area distributed the Gidum and Magnatum and then was found taking out the lime stone easily quickly. The speed of the limestone being made was 50~300 times faster than the natural process.

It is too early to generalize the research results from the Arizona university, but it shows that ants have the opportunity to play the role of an agent of blocking global warming. An ant expert in Harvard EO Wilson professor said 3 species of ants eating on Earth can make calcium carbonate by self.

Professor Ronald Dorn of Arizona University who has led this research explained “this experiment shows that ants have a huge opportunity to give effect to changing Earth's temperature/adding but since we are still in the beginning of the research, a large generation will be no good.”

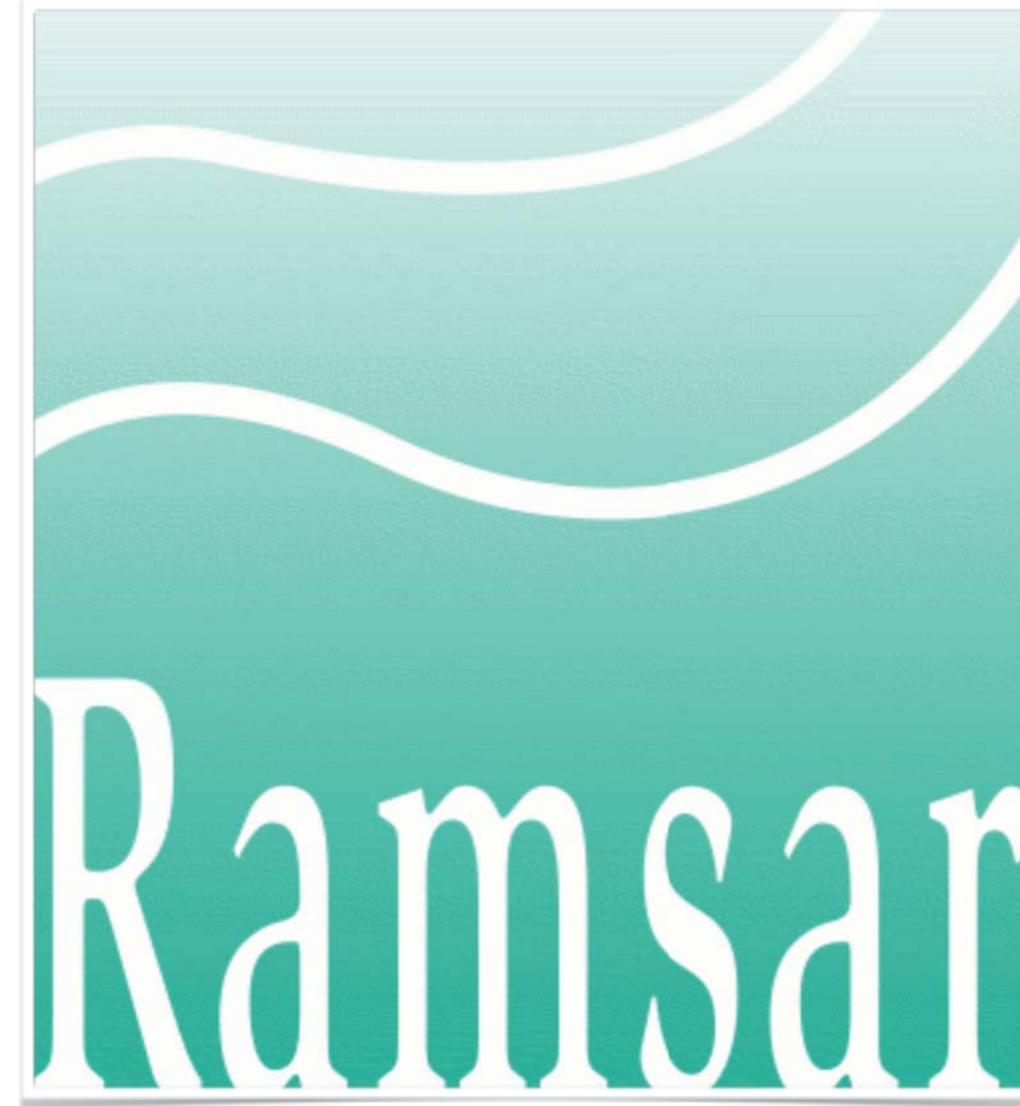

Also this experiment result has been announced on the 1st last month on the Journal Geolog.
