

Bali Strategic Plan for Technology Support and Capacity Building (BSP)

Objective and Order of Presentation

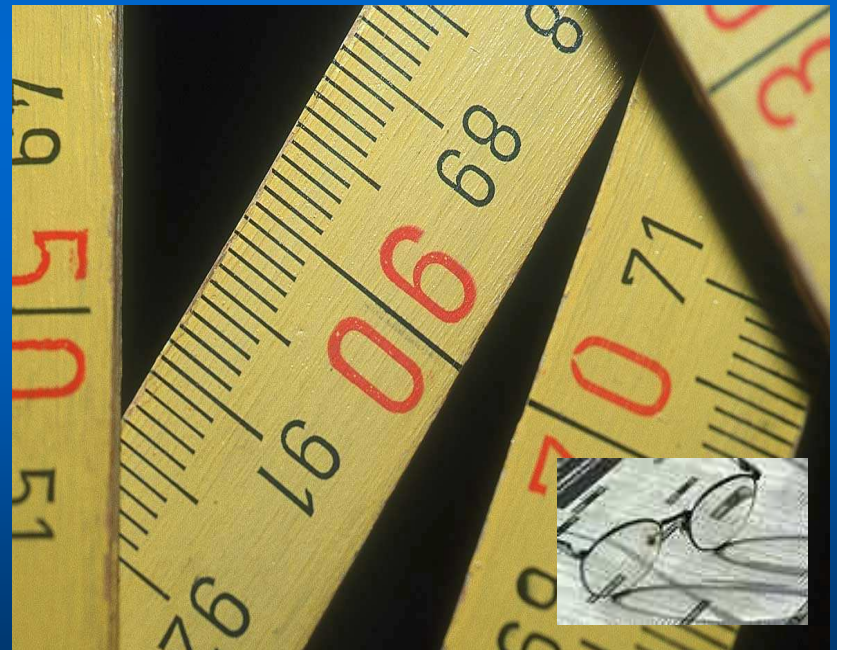

Objective:
To explain to w/shop
participants the key
aspects of BSP

Order of presentation

1. What is BSP
2. Purpose of BSP
3. Basic approach
4. Key elements
5. Progress

What is BSP?

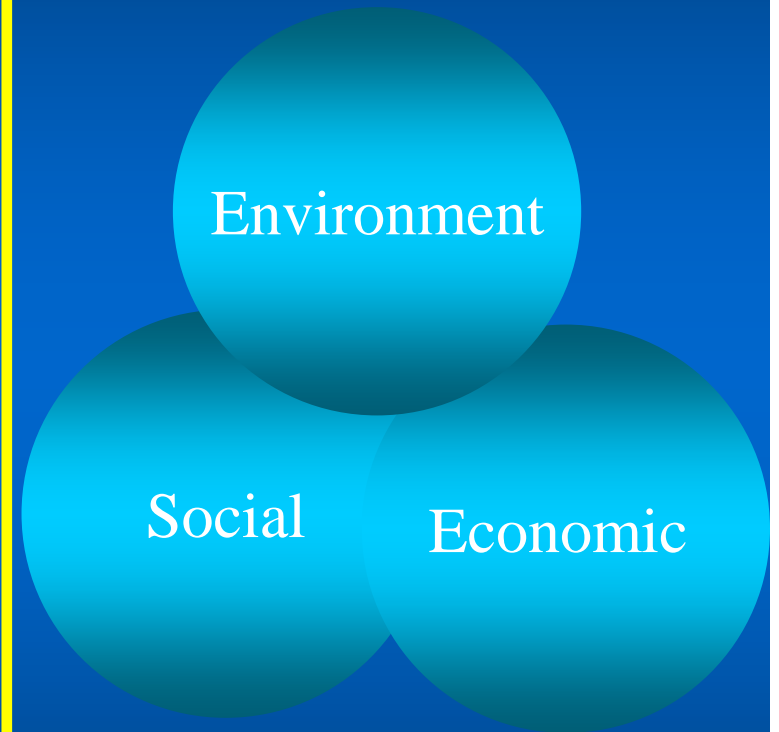

- Intergovernmentally agreed approach
- One of 5 IEG outcomes
- More than UNEP
- Consistent with UN reform
- Consistent with Paris declaration on aid effectiveness

What is BSP for?

- Reinforce role of UNEP
- Make UNEP more responsive to country needs
- Provide a coherent platform for all actors
- Strengthen cooperation and partnerships + with private sector
- Impact significantly on socio-economic development in the provision of environmental goods and services.

What is the BSP Approach?

- Build on existing capacities
- National ownership, to sustain capacities
- Bottom up needs assessment based on NCSA, etc
- Coordinated within EMG, UNDG, RC
- Non-duplicative of effort

Bottom up approach

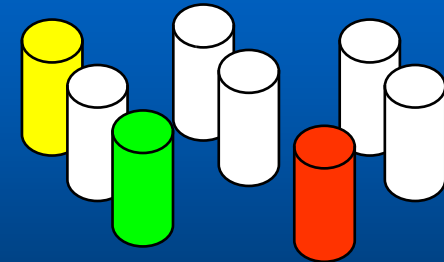

What are the elements?

- Transforming national needs into a set of strategic priorities + means to implement
- Enhancement of centers of excellence
- Exchange of best practices and lessons learned
- South-south cooperation

National Strategic Priorities

Thematic needs

Progress

- BSP database, CHM, site
- Review of methodologies for needs assessment
- BSP Pilot projects in Africa (6 countries); Guatemala and Nicaragua in LAC
- Mainstreaming BSP in PoW 2008/9

Thank You
