EU-China Biodiversity Programme (ECBP)

ECBP Components

Goals of ECBP

Policy and Institutional Strengthening

- To strengthen the capacity and effectiveness of CBD SC;
- To integrate BD into sector and economic policies;
- To mainstream BD into SEA and EIA;
- To integrate biodiversity into land use plans;
- To strengthen BD monitoring.

Field Projects

- To demonstrate models for BD important areas;
- To explore models for local communities;
- Local implementation and demonstration of national policies and actions;
- introduction and demonstration of advanced international technology.

Visibility and Awareness

- To raise biodiversity awareness;
- To develop a communication strategy to enhance coherence and effectiveness of ECBP;
- To publicize ECBP activities and outputs.

Case I

Formulation and Approval Processes of PBSAPs promote mainstreaming

Key word: Expert, Official, Sector, Government

Provincial Biodiversity Strategy and Action Plan

Chongqing

Sichuan

Yunnan

SW Guangxi

Prefectural Biodiversity Strategy and Action Plan

Anqing

Xinyang

Lhasa

Alashan

17 of 22 were approved by the governments

Case II

Mainstreaming BD into Performance Evaluation of Officials

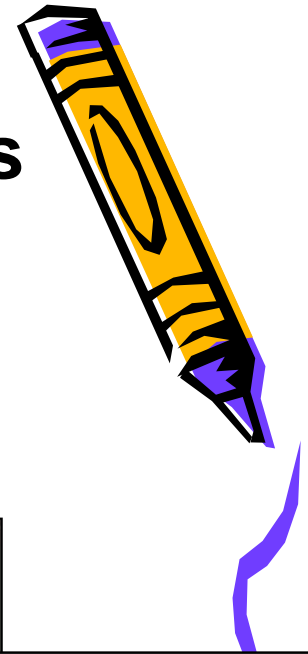

Key Words: Mainstreaming, Biodiversity, Performance Appraisal,

Chongqing: Biodiversity was integrated into the Government Comprehensive Performance Appraisal System

Anqing: Municipal government incorporated biodiversity into the performance appraisal system of government officials

Case III

SEA/EIA Bring Biodiversity into All Sectors

Key Words: SEA/EIA, Biodiversity, Sector

Chongqing: Developed BD Assessment Guidelines for :

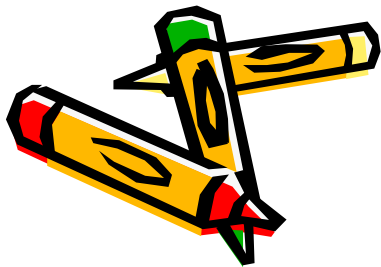

Regional Development and Planning

Mining Development

Hydropower Construction

Linear Engineering Projects

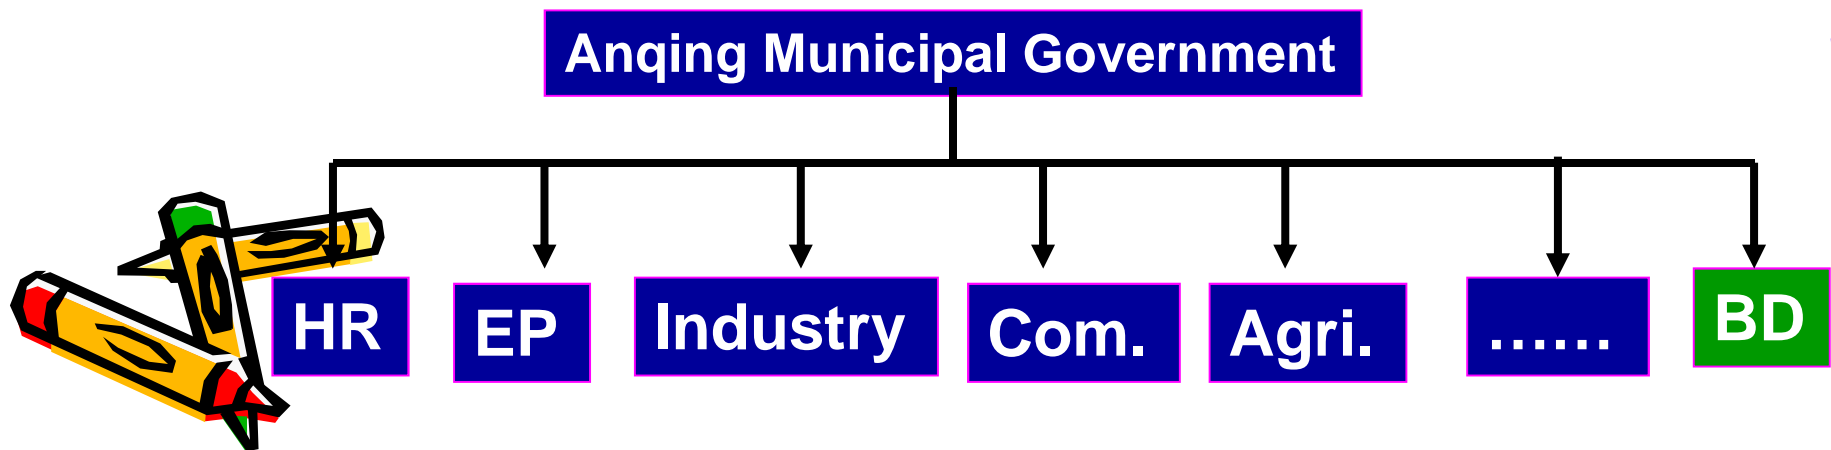

Tourism Development

Establishment of Permanent DB Department in the Government

Key Words: BD Sector, Permanent

Anqing municipal government established a “Biodiversity Management Office” which was incorporated into the institutional structure of the government. The newly set-up permanent sector guarantees the sustainability of the project concepts, methods and technology, and permanently strengthen biodiversity management of the region.

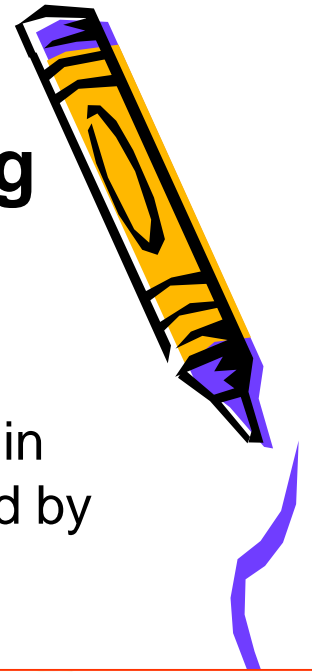

Case V

Mainstreamed BD into land use planning

Key Words: Biodiversity, Mainstreaming, Land use

Under ECBP, MLR mainstreamed BD into land use planning in Hainan and Guizhou. The two plannings have been approved by the State Council. Land use planning

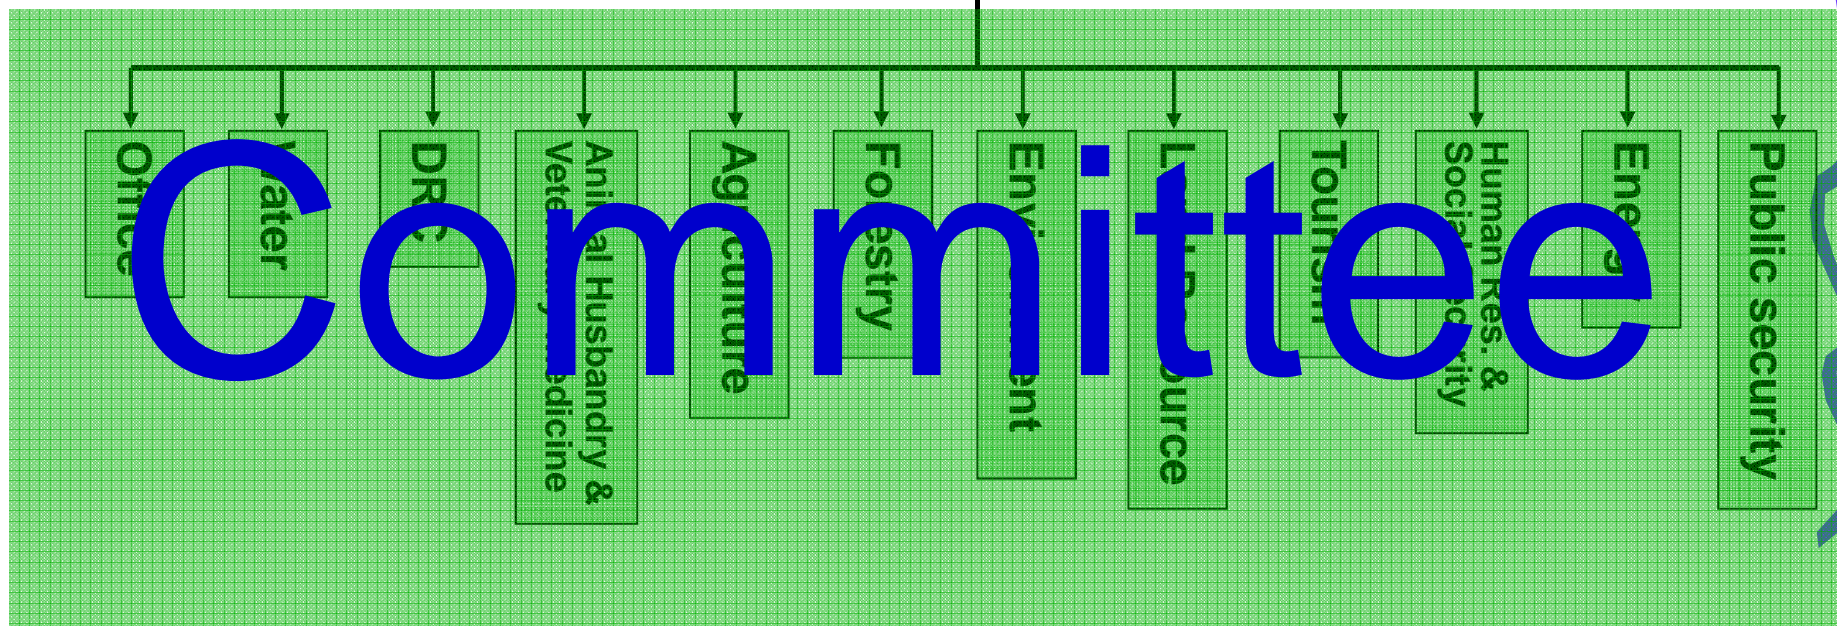

Super-Department System Pilot

Key Words: BD, Giant Sector, Coordination

ECBP carried out a pilot reform in Yumin County, Xinjiang. An Eco-environment Conservation Committee was established and 12 BD-related sectors were integrated into the Committee. Coordination and cooperation in BD-related issues have been solved.

Yumin County Eco-environment Conservation Committee

Mainstream BD into Policies and Laws

Key Words: BD, Regulation, Methods

- Chang Tang Biodiversity Monitoring Technique Regulation
- Measures of Local Conservation Area Establishment and Management in Guangxi
- Xinyang Municipality Wetland Resource Protection Regulation
- Hulunbeir Grasslands Biodiversity Management Methods
- Yunnan Regulations for establishment of individual national parks – Laojunshan, MeiliXueshan

**All of them were approved
by the Local Governments**

Promoting BD Mainstreaming into Twelfth Five-Year Plan

Key Words: BD, Mainstreaming Five-Year Plan

86% of the provinces that had ECBP activities integrated BD into their 12th Five-Year Plan; Only **17%** of those which did not have ECBP activities mainstreamed BD into their 12th Five-Year Plan

Thank You
