10. Conservation, Protection and Rehabilitation of the Environment and Natural Resources Towards Sustainable Development

Chapter 10-Conservation, Protection, & Rehabilitation of Environment & Natural Resources Towards Sustainable Development

Vision

An environment that is healthy, ecologically-balanced, sustainably productive, climate-change resilient and provides for present and future generations of Filipinos

Chapter 10-Conservation, Protection, & Rehabilitation of Environment & Natural Resources Towards Sustainable Development

Goals

- Improved conservation, protection and rehabilitation of natural resources
- Improved environmental quality for cleaner and healthier environment
- Enhanced resilience of natural systems and improved adaptive capacities of human communities to cope with environmental hazards including climate-related risks

Biodiversity Goal:

Improve protection and conservation of biodiversity

- Conserve, preserve, and manage protected areas, wildlife, and their habitats;
- Prepare protected area management plan incorporating vulnerability and adaptability of the sector to disaster risk and climate change;
- Institute and operationalize the concept of Payment for Environmental Services (PES); and
- Continue implementing international commitments on biodiversity conservation, protection and rehabilitation

Cross-cutting Strategies

- Effective Environmental Governance
- Continued Institutional Strengthening and Capacity Building
- Research, Development, Extension and Knowledge Management
- Environment and Natural Resource Financing

Lessons Learned

Broad-based consultation:

- Ensures that voices are heard and stakeholders concerns are put forward;
- Facilitates mainstreaming at the local levels

Multi-stakeholder participation:

- Enhances plan formulation, implementation, monitoring and evaluation;
- Enhances stakeholders' ownership;
- Enhances stakeholders awareness on their respective contribution to national targets

Sentro ang tao sa ating plano.
