The strategy and Action Plan exercise is due to start in June 2001 and is funded by GEF. It is expected to cover 14 months.

The Ramsar Convention focal point is the same as the CBD focal point which makes co-operation a none issue. The CITES focal point is co-operating with the CBD focal point to a limited extent in implementing the convention. This situation is being reviewed to ensure stronger co-operation.

Botswana is not a party to the Bonn convention yet.

The Southern Africa Plant Genetic Resources Centre and  
NORDIC Gene bank have assisted with funding for different activities.

***Further comments on implementation of this Article***

The local National Genetic Centre has collaborative activities at both regional and international level. It has received funding through the SADC genebank mostly for capacity building.

Recently, in 1999, a regional project on management of Farm Animal Genetic Resources funded by FAO/UNDP/SADC was started. It is currently in operation and has encouraged the formation of national structures for the long term management of Farm Animal Genetic Resources.

Under the current National Development Plan (NDP) there is a government planned and funded project on the conservation of indigenous livestock species with planned activities to cater for both in-situ and ex-situ conservation.

However, no work has started yet to address micro-organisms.

The National museum includes a botanical garden that propagates and grows indigenous plants. The museum also plans to keep small animals. The Department of Wildlife and National Parks does rehabilitate animals when necessary.

Experience from the Forestry sector indicates that incentives are fairly successful in fostering conservation and sustainable use measures. On forestry reserves, a simple arrangement of salvage logging of damaged, diseased and dead trees at nominal prices seems to be conducive to responsible behaviour by participating communities. A National Conservation Strategy and Action Plan is currently under consideration and it advocates for the formalisation of incentives and disincentives that cover the whole field of environmental conservation.

The financial situation for implementation of CBD will become clearer once the Biodiversity Strategy and Action Plan is available. As it is the assessment is based on individual performances of the various institutions involved in the management of the country's biodiversity. The level of funding specifically allocated to CBD implementation will then become clearer as well as its relationship to other national priorities and programmes. Hopefully this will start with NDP 9, preparations of which are already underway.

***Please use this box to provide any further comments on matters related to national implementation of the Convention:***

Botswana developed the National Conservation Strategy (NCS) in 1990 which culminated in a National Policy on Natural Resources Conservation and Development. The strategy identifies both development and conservation goals. The development goals include development of: a) new, better and sustainable natural resources uses b) links with neighbouring countries in conserving resources. The conservation goals are:- a) conservation of all ecosystems, wildlife and cultural resources b) protection of endangered species c) distribution of income and rewarding equitably in the interest of conserving natural resources d) maintenance of renewable resources whilst increasing the sustainable yields.

In compliance with the requirements of CBD, Botswana will soon develop BSAP that will specifically focus on the country's actions aimed specifically at the implementation of CBD and harmonisation with existing biodiversity national policies and programmes.
