

Please provide the following details on the origin of this report.

Contracting Party:	Republic of Croatia
<i>National Focal Point</i>	
Full name of the institution:	Faculty of Science, University of Zagreb
Name and title of contact officer:	Toni Nikolic dr. sc.
Mailing address:	Department of Botany, Faculty of Science, University of Zagreb, Marulicev trg 20/2, HR- 10000 Zagreb, Croatia
Telephone:	++385 1 4844 003
Fax:	++385 1 4844 003
E- mail:	toni@botanic.hr
<i>Contact officer for this report (if different)</i>	
Name and title of contact officer:	Jasminka Radovic, B Sc
Mailing address:	Bogoviceva 1a, 10000 Zagreb, Croatia
Telephone:	+385 1 4874 743
Fax:	+385 1 4876 100
E- mail:	jasminka.radovic@dzzp.hr
<i>Submission</i>	
Signature of officer responsible for submitting national report:	
Date of submission:	12. July 2004.

Please provide summary information on the process by which this report has been prepared, including information on the types of stakeholders who have been actively involved in its preparation and on material which was used as a basis for the report.

**REPORT ON IMPLEMENTATION OF PROGRAMME OF WORK FOR THE
GLOBAL TAXONOMY INITIATIVE**

**Programme of Work for the Global Taxonomy Initiative
Annex to Decision VI/8**

Operational Objective 1. Assess taxonomic needs and capacities at national, regional and global levels for the implementation of the Convention

1. Has your country undertaken any taxonomic needs assessments and identified priorities in this regard?	
a) no (please specify the reasons)	X - There are no funds for such activities, no application was made until now
b) no, but assessment is under way	
c) yes, some needs assessments made (please provide details)	
d) yes, comprehensive assessments made (please provide details)	
Further comments on country-based taxonomic needs assessments and identification of priorities	
The small assessment was made for the purpose of participation on GTI workshop held in Vilm in July 2004, as a presentation of personal opinion of focal point.	
2. Has your country worked with other countries in the region to undertake regional taxonomic needs assessments and identify priorities in this regard?	
a) no (please specify the reasons)	X- No, there are no coordinations
b) no, but some collaborative projects are being considered or planned	
c) yes, some activities undertaken (please provide details)	
d) yes, many activities undertaken (please provide details)	
Further comments on regional taxonomic needs assessment and identification of priorities	
Some effort was done during Vilm declaration production	
3. Is your country involved in any activities as part of a global taxonomic needs assessment?	
a) no	X
b) yes (please provide details)	
Further comments on the involvement in the activities for the global taxonomic needs assessment	

--

4. Is your country undertaking any activities of public education and awareness to promote the implementation of the programme of work for the GTI?	
a) no	X
b) yes, some programmes developed and some activities undertaken (please provide details)	
c) yes, comprehensive programmes developed and many activities undertaken (please provide details)	
Further comments on public education and awareness programmes and activities	

Operational objective 2. Provide focus to help build and maintain the systems and infrastructure needed to obtain, collate and curate the biological specimens that are the basis for taxonomic knowledge

5. Is your country working to strengthen global and regional capacity building to support access to and generation of taxonomic information ¹ ?	
a) no (please specify the reasons)	
b) no, but some programmes under development	
c) yes, limited capacity building (please provide details)	X
d) yes, significant capacity building (please provide details)	
Further comments on global and regional capacity building to support access to and generation of taxonomic information	
Capacity building is mostly related to Universities, Natural History Museums and Institutes as a part of usually investments in governmental institutions in the form of maintenance and projects support	
6. Is your country working with other countries to create and/or strengthen the networks for regional cooperation in taxonomy?	
a) no	
b) no, but consultation is under way	X
c) no, but some plans and programmes are under development	
d) yes, some activities undertaken for this purpose (please provide details)	
e) yes, comprehensive activities undertaken for this purpose (please provide details)	

¹ Responses to question 5 are expected to focus on, but not limited to (a) human capacity building; (b) infrastructure capacity building.

Further comments on strengthening of existing networks for regional cooperation in taxonomy

Operational objective 3. Facilitate an improved and effective infrastructure/system for access to taxonomic information, with priority on ensuring that countries of origin gain access to information concerning elements of their biodiversity

7. Is your country involved in the development of a coordinated global taxonomy information system, in particular the infrastructure to access digitized data/information?

a) no

b) no, but some plans are being considered

c) yes, to a limited extent (please provide details)

X

d) yes, to a significant extent (please provide details)

Further comments on involvement in the development of a coordinated global taxonomy information system

Some types of data are available or will be available soon as a public database Internet based or with deeper access for particular users. The data are for national planning purposes, but interesting for wider beneficiary

Operational objective 4. Within the major thematic work programmes of the Convention include key taxonomic objectives to generate information needed for decision-making in conservation and sustainable use of biological diversity and its components

8. Has your country made any taxonomic studies and inventories at the national level, which provide a basic assessment of forest biological diversity, in particular in areas under current threat for habitat conversion, or of high conservation value?

a) no (please provide the reasons)

b) no, but some programmes are under development

c) yes, some studies and inventories made (please provide details)

X

d) yes, comprehensive studies and inventories made (please provide details)

Further comments on taxonomic studies and inventories made for a basic assessment of forest biological diversity

Mostly, the inventories was never made on systematic and planning platform. The efforts and results are related to individual, project or institutional level according to the interests changeable in time and space (on gene and taxon levels). Data alternate from (none) simple check lists form to compound monographs. Vegetation maps are available (in manuscript form in scale 1:50.000, cca 5% published in scale 1:100.000, mostly out of date) Recently, in Governmental organisation, habitats mapping (finished) and landcover mapping (in development) was undertaken containing forest types.

9. Has your country undertaken any taxonomy-related activities relating to marine and coastal biodiversity, in particular taxonomic work related to identification of ballast water organisms and monitoring health of mangrove systems through their invertebrate fauna?	
a) no	
b) not applicable	
c) no, but some programmes are under development	
d) yes, some activities undertaken (please provide details)	X
e) yes, many measures undertaken (please provide details)	
Further comments on taxonomy-related activities identified in the programme of work on marine and coastal biodiversity	
Mostly, the inventories was never made on systematic and planning platform. The efforts and results are related to individual, project or institutional level according to the interests changeable in time and space (on gene and taxon levels). Data alternate from (none) simple check lists form to compound monographs. Recently, in Governmental organisation, habitats mapping was done containig marine habitats.	
10.Has your country developed taxonomic support for implementing relevant actions identified in the programme of work on dry and sub-humid lands biodiversity, in particular identification of key indicator taxa like lichens?	
a) no (please provide reasons and plans for improvement)	X
b) not applicable	
c) no, but some programmes are under development	
d) yes, some activities undertaken(please provide details)	
e) yes, many activities undertaken (please provide details)	
Further comments on taxonomic support for implementing the programme of work on dry and sub-humid lands biodiversity	
No special support was developed and no relevant actions was done. Profesional staff for work with lichenes is insufficient, consist from only one person. Some threatened taxa was identified, and some action plans are suggested.	
11.Has your country developed taxonomic support for implementing relevant actions identified in the programme of work on inland waters biodiversity, in particular regional guides to freshwater fish and invertebrates as an input to ecosystem monitoring for river and lake health?	
a) no	
b) no, but some programmes are under development	
c) yes, some activities undertaken(please provide details)	X
d) yes, many activities undertaken (please provide details)	
Further comments on taxonomic support for the implementation of the programme of work on inland waters biodiversity	
No special support was developed. The work on inland waters biodiversity, freshwater fish and invertebrates are part of activities of several labs connected to universities and institutes. Part of data are related to monitoring. Croatian waters company have responsibility for water quality monitoring in rivers and lakes through the network of monitoring points.	

12. Has your country undertaken any taxonomy-related activities identified in the programme of work on agricultural biodiversity as well as relevant activities identified in the International Pollinator Initiative and the International Soil Biodiversity Initiative?	
a) no	
b) no, but some activities are being planned	
c) yes, some activities undertaken (please provide details)	X
d) yes, comprehensive activities undertaken (please provide details)	
Further comments on taxonomy-related activities for the implementation of the programme of work on agricultural biodiversity	
Some of activities are taxonomy-related, but not planned as such one. The work on agricultural biodiversity, are part of activities of several labs connected to universities and institutes. Activities on International Pollinator Initiative and the International Soil Biodiversity Initiative are not commence, according to my knowledge.	
13. Is your country developing any taxonomic support for the implementation of the programme of work on mountain biodiversity, in particular identification of biodiversity components unique to mountain ecosystems?	
a) no	
b) no, but some programmes are under development	
c) yes, limited support (please provide details)	X
d) yes, significant support (please provide details)	
Further comments on taxonomic support for the implementation of the programme of work on mountain biodiversity	
Some of activities are taxonomy-related, but not planned as such one. The work on mountain biodiversity are part of activities of several labs connected to universities museums and institutes. The most important effort are going on, related to GEF funded project Karst Ecosystem Conservation containing inventarisation of main groups in target area (cca 4% of state territory)	
14. Has your country developed taxonomic support for the implementation of the programme of work on protected areas?	
a) no	X
b) no, but some programmes are under development	
c) yes, some programmes in place and are being implemented (please provide details)	
d) yes, comprehensive programmes are being implemented (please provide details)	
Further comments on taxonomic support provided to the implementation of the programme of work on protected areas	
Some of activities are taxonomy-related, but not planned as such one.	

Operational objective 5. Within the work on cross-cutting issues of the Convention include key taxonomic objectives to generate information needed for decision-making in conservation and sustainable use of biological diversity and its components

15. Has your country taken any measures to strengthen capacity for the inventory and classification of biodiversity and its components in the development of a national strategy on access and benefit-sharing?	
a) no	X
b) no, but some programmes are under development	
c) yes, some measures taken (please provide details)	
d) yes, comprehensive measures taken (please provide details)	
Further comments on the measures to strengthen capacity for the inventory and classification of biodiversity and its components in the development of a national strategy on access and benefit-sharing	
National strategy and Action Plans for conserving biodiversity contain the list of action plans related to strengthen capacity for the inventory and classification of biodiversity and its components but only on the level of vision. Not implemented yet.	
16. Has your country developed taxonomic support to address the issues of invasive alien species?	
a) no	X
b) no, but relevant policy and programme under development	
c) yes, some policies and programmes in place (please provide details)	
d) yes, comprehensive policies and programmes in place (please provide details)	
Further comments on taxonomic support to address the issues of invasive alien species	

17. Has your country developed taxonomic information system to support the maintenance, preservation and protection of traditional knowledge, innovations and practices of indigenous and local communities in accordance with Article 8(j) and related provisions?	
a) no	X
b) not applicable	
c) no, but some programmes are under development	
d) yes, some activities undertaken but a system is not in place yet (please provide details)	
e) yes, a taxonomic information system in place (please provide details)	
Further comments on the taxonomic information system to support the maintenance, preservation and protection of traditional knowledge, innovations and practices of indigenous and local communities	

18. Has your country undertaken any taxonomy-related activities that support the implementation of the ecosystem approach and the work in the field of assessments, monitoring and indicators?	
a) no	
b) no, but some programmes are under development	X
c) yes, some programmes in place (please provide details)	
d) yes, comprehensive programmes in place (please provide details)	
Further comments on programmes and activities to support the implementation of the ecosystem approach and the work in the field of assessments, monitoring and indicators	

If your country wishes to provide additional information on implementation of this programme of work, please do so in the following space
