Please provide summary information on the process by which this report has been prepared, including information on the types of stakeholders who have been actively involved in its preparation and on material which was used as a basis for the report

The manager and staff members of the Republic of the Marshall Islands Environmental Protection Authority (RMIEPA) prepared this report. The task was specifically assigned to the Biodiversity Conservation Officer at the RMIEPA. Due to lack of human resources and other pressing concerns in the first few months of receiving the report it is in-complete in some areas.

However, enclosed with the hard copy of this report is a copy of the Marshall Islands Biodiversity Strategies and Action Plan. Much of the information on this questionnaire is based on the RMI NBSAP. Some additional background information on the CBD was sought in the information book *The Convention on Biological Diversity: An Information Package for Pacific Island Countries*. Provided to Pacific Island Countries by the South Pacific Regional Environmental Program (SPREP) with assistance from Foundation for International Environmental Law and Development (FIELD). Copies of the National Report will be distributed once they have been printed.

Brief consultations were undertaken with individuals from

-Ministry of Foreign Affairs

-Nancy Vandervelde, Consultant involved with the formulation of the NBSAP and National Report.

Please provide information on any particular circumstances in your country that are relevant to understanding the answers to the questions in this report

The Republic of the Marshall Islands has recognised the importance of its unique biodiversity, particularly in the Marine and Coastal areas along with several culturally significant plants. The National Report and the National Biodiversity Strategies and Action Plan were completed and adopted by the Cabinet in June 2000.

There is a National Environmental Protection Act (NEPA), however, review and revision of existing legislation needs to be undertaken in order to enforce legislation effectively.

The main limitations that will be recurring in this questionnaire are the lack of human and financial capacity to address various articles of the Convention.

The COP has established programmes of work that respond to a number of Articles. Please identify the relative priority accorded to each theme and the adequacy of resources. This will allow subsequent information on implementation of each Article to be put into context. There are other questions on implementation of the programmes of work at the end of these guidelines.

Inland water ecosystems

1. What is the relative priority for implementation of this work programme in your country?	
a) High	
b) Medium	
c) Low	√
d) Not relevant	
2. To what extent are the resources available adequate for meeting the obligations and recommendations made?	
a) Good

Biological diversity of dry and sub-humid lands

9. What is the relative priority for implementation of this work programme in your country?	
a) High	
b) Medium	
c) Low	√
d) Not relevant	
10. To what extent are the resources available adequate for meeting the obligations and recommendations made?	
a) Good	
b) Adequate	
c) Limiting	
d) Severely limiting	√

Further comments on work programmes and priorities

The areas of biodiversity of highest priority in the Marshall Islands are the Marine and Coastal diversity and the Agricultural diversity. Due to the geography of the Marshall Islands much attention is given to Marine and Coastal areas.

Biological Diversity of Forests is not a high priority in the Marshall Islands as there is little in terms of forestry.

Dry sub-humid lands include the northernmost atolls of the Marshall Islands there is limited knowledge on the diversity that occurs in these islands.

Inland water ecosystems are limited in the Marshall Islands. There is limited knowledge on the biodiversity that occurs in them.

Article 5 Cooperation

11. What is the relative priority afforded to implementation of this Article and the associated decisions by your country?					
a) High		b) Medium	√	c) Low	
12. To what extent are the resources available adequate for meeting the obligations and recommendations made?

13. Is your country actively cooperating with other Parties in respect of areas beyond national jurisdiction for the conservation and sustainable use of biological diversity?	
a) bilateral cooperation (please give details below)	
b) international programmes (please give details below)	
c) international agreements (please give details below)	

Decision IV/4. Status and trends of the biological diversity of inland water ecosystems and options for conservation and sustainable use

14. Has your country developed effective cooperation for the sustainable management of transboundary watersheds, catchments, river basins and migratory species through bilateral and multilateral agreements?	
a) no	√
b) yes - limited extent (please give details below)	
c) yes - significant extent (please give details below)	
d) not applicable	

Decision IV/15. The relationship of the CBD with the CSD and biodiversity-related conventions, other international agreements, institutions and processes or relevance

15. Has your country developed management practices for transboundary protected areas?	
a) no	√
b) yes - limited extent (please give details below)	
c) yes - significant extent (please give details below)	
d) not relevant	

Decision V/21. Co-operation with other bodies

16. Has your country collaborated with the International Biodiversity Observation Year of DIVERSITAS, and ensured complementarity with the initiative foreseen to be undertaken by the United Nations Educational, Scientific and Cultural Organization and the Secretariat of the Convention on Biological Diversity to increase scientific knowledge and public awareness of the crucial role of biodiversity for sustainable development?	
a) no	√

b) to a limited extent	
c) to a significant extent	

Decision V/27. Contribution of the Convention on Biological Diversity to the ten-year review of progress achieved since the United Nations Conference on Environment and Development

17. <i>Is your country planning to highlight and emphasize biological diversity considerations in its contribution to the ten-year review of progress since the Earth Summit?</i>	
a) no	
b) yes

43. Has your country adopted a "step-by-step" approach to implementing Article 7 with initial emphasis on identification of biodiversity components (7a) and activities having adverse effects on them (7c)?	
a) no	
b) not appropriate to national circumstances	
c) yes	√

44. Is your country cooperating with other Contracting Parties on pilot projects to demonstrate the use of assessment and indicator methodologies?	
a) no	√
b) yes (if so give details below)	

45. Has your country prepared any reports of experience with application of assessment methodologies and made these available to other Contracting Parties?	
a) no	√
b) yes	

46. Is your country seeking to make taxonomic information held in its collections more widely available?	
a) no relevant collections	√
b) no action	
c) yes (if so, please give details below)	

Decision V/7. Identification, monitoring and assessment, and indicators

47. Is your country actively involved in co-operating with other countries in your region in the field of indicators, monitoring and assessment?	
a) no	√
b) limited co-operation	
c) extensive co-operation on some issues	
d) extensive co-operation on a wide range of issues	

48. Has your country made available case studies concerning the development and implementation of assessment, monitoring and indicator programmes?	
a) no	√
b) yes - sent to the Secretariat	
c) yes - through the national CHM	
d) yes - other means (please specify)	
49. Is your country assisting other Parties to increase their capacity to develop indicator and monitoring programmes?	
a) no	
b) providing training	
c) providing direct support	
d) sharing experience	√
e) other (please describe)	

Further comments on implementation of this Article

A tiered approach to monitoring biodiversity was adopted in order to overcome constraints of monitoring biodiversity components.

1. The first tier of biological diversity monitoring in the Marshall Islands would be revived and strengthened systems based on traditional concepts, reintroduced through the national legislation and local government ordinances.
2. The second tier of monitoring biodiversity components would be at the local government level. The current system of local government provides an existing structure that maintains a presence and control in each of the inhabited atolls and islands. These local governments also provide a means of communication between atolls and with the national government. Each local government has the authority to influence resource management decisions with each atoll through local government.
3. The third tier of monitoring would be at the national level, where national government agencies and statutory bodies would take overall responsibility for setting up an enabling legislation and policy framework. This tier would also provide appropriate research and development activities on threats to biological diversity components, particularly the threat posed by invasive species.

d) action plan in place	
e) reports on implementation available	
52. Is your country making available appropriate resources to enhance the availability of taxonomic information?	
a) no	√
b) yes, but this does not cover all known needs adequately	
c) yes, covering all known needs	
53. Is your country encouraging bilateral and multilateral training and employment opportunities for taxonomists, particularly those dealing with poorly known organisms?	
a) no	√
b) some opportunities	
c) significant opportunities	
54. Is your country investing on a long-term basis in the development of appropriate infrastructure for your national taxonomic collections?	
a) no	√
b) some investment	
c) significant investment	
55. Is your country encouraging partnerships between taxonomic institutions in developed and developing countries?	
a) no	√
b) yes - stated policy	
c) yes - systematic national programme	
56. Has your country adopted any international agreed levels of collection housing?	
a) no	√
b) under review	
c) being implemented by some collections	
d) being implemented by all major collections	

57. Has your country provided training programmes in taxonomy?	
a) no	√
b) some	
c) many	
58. Has your country reported on measures adopted to strengthen national capacity in taxonomy, to designate national reference centres, and to make information housed in collections available to countries of origin?	
a) no	√
b) yes - in the previous national report	
c) yes - via the clearing-house mechanism	
d) yes - other means (please give details below)	
59. Has your country taken steps to ensure that institutions responsible for biological diversity inventories and taxonomic activities are financially and administratively stable?	
a) no	√
b) under review	
c) yes for some institutions	
d) yes for all major institutions	
60. Has your country assisted taxonomic institutions to establish consortia to conduct regional projects?	
a) no	√
b) under review	
c) yes - limited extent	
d) yes - significant extent	
61. Has your country given special attention to international funding of fellowships for specialist training abroad or for attracting international experts to national or regional courses?	
a) no	
b) under review	
c) yes - limited extent	√
c) yes - significant extent	
62. Has your country provided programmes for re-training of qualified professionals moving into taxonomy-related fields?	
a) no	√
b) some	
c) many	

**Decision V/9. Global Taxonomy Initiative: Implementation and further
advance of the Suggestions for Action**

63. Has your country identified its information requirements in the area of taxonomy, and assessed its national capacity to meet these requirements?	
a) no	√
b) basic assessment	
c) thorough assessment	
64. Has your country established or consolidated taxonomic reference centres?	
a) no	√
b) yes	
65. Has your country worked to increase its capacity in the area of taxonomic research?	
a) no	√
b) yes	
66. Has your country communicated information on programmes, projects and initiatives for consideration as pilot projects under the Global Taxonomy Initiative to the Executive Secretary?	
a) no	√
b) yes	
67. Has your country designated a national Global Taxonomy Initiative focal point linked to other national focal points?	
a) no	√
b) yes	
68. Has your country participated in the development of regional networks to facilitate information-sharing for the Global Taxonomy Initiative?	
a) no	√
b) yes	
<i>If a developing country Party or Party with economy in transition -</i>	
69. Has your country sought resources through the financial mechanism for the priority actions identified in the decision?	
a) no	√
b) applied for unsuccessfully	
c) applied for successfully	

Further comments on implementation of these decisions

Information in the field of taxonomy is insufficient due to lack of local expertise in the area. Any work that may have been undertaken by expatriates in the past has not been continuous.

International funding of fellowships for specialist training abroad is always given special consideration as it provides opportunities for local people to obtain further training and capacity building.

Decision II/7 Consideration of Articles 6 and 8 of the Convention

85. Is action being taken to share information and experience on implementation of this Article with other Contracting Parties?	
a) little or no action	√
b) sharing of written materials and/or case-studies	
c) regional meetings	

Further comments on implementation of this Article

In-situ conservation is currently being addressed through the establishment of protected areas. One such project is the Jaluit Atoll Conservation Project. It was initiated in 1997 and has focused on protecting and conserving its declining numbers of trochus and giant clams due to over-exploitation by locals for export to the main island of Majuro.
