#### **Multi-Stakeholders Committee**

Marine Parks and Reserves in Tanzania are governed by the Board of Trustees for Marine Parks and Reserves. The Board was established by the Parliamentary Act No 29 of 1994. Daily activities of the Board are run by Marine Parks and Reserves Unit (MPRU) which was established under the same Act.

MPRU administration structure consists of the Chief Executive, the Manager who is assisted by Heads of five departments namely, finance, administration, conservation, planning, information and communication, and tourism. At field level there are Warden- In charges who are the overseers of operational matters pertained to conservation issues in their respective marine parks or marine reserves. Currently, there are 3 marine parks and 15 marine reserves.

#### Description of Protected Area system information

#### Coverage

Target 11 of the Aichi Targets states that: By 2020, at least 17 per cent of terrestrial and inland water, and 10 per cent of coastal and marine areas, especially areas of particular importance for biodiversity and ecosystem services, are conserved and effectively and equitably managed. The national target and Vision for protected areas under target 11 of the Aichi Targets has been translated into Marine and Coastal Management Program (MACEMP), by 2011 the country was required to record an increase in area from open access to effectively managed access from 4% to 10% within territorial seas.

As to the current status, the cumulative of size of gazetted areas is 2,172.7 km², representing about 6.5% of the Territorial Sea under protection. The priority has been protection of species diversity, marine resource habitats, restoration of fish stocks, protection of endangered species and support of livelihood of communities living within the protected areas or vicinity

#### **Description and Background**

The idea to develop Marine Parks and Reserves in Tanzania dates back to the 1960's when surveys of marine habitats mainly reefs were conducted and several sites legislated as marine reserves in the mid 1970s. However, no specific management and institutional mechanism was put in place to effectively manage the reserves apart from allocating the authority to the Department of Fisheries.

The desire by the villagers of Mafia district to establish a protected area in their waters in the late 1980's stimulated the national interest in the creation of marine protected areas in Tanzania. Subsequently, a number of studies to investigate marine resources and their uses were conducted in Mafia. The studies identified Mafia Island as a suitable site for the establishment of the first marine park in the country.

Beginning from 1990s the Government in collaboration with other key stakeholders worked seriously to ensure that the ideas of establishing Marine Parks and Reserves in the country became a reality. In 1994 the legislation to specifically deal with the management and administration of the Marine Parks and Reserves No 29, 0f 1994 was enacted by the Parliament. The Act provides for the legal framework for the conservation, management and wise use of marine waters with its prolific fauna and flora life. It also provides for all reasonable uses by fisher folks, commercial operators and holiday markers, scientists, divers, photographers and reef watchers. Within the Framework of this legislation, Mafia Island Marine Park was declared the First Marine Park in Mainland Tanzania in 1995.

Acting within the power entrusted to it by Act No. 29 of 1994, by then the Minister of Natural Resources and Tourism in 1996 appointed the Board of Trustees for Marine Parks and Reserves as a semi-autonomous governing body responsible for the management and administration of marine protected areas in the country. In 1999 five (5) marine reserves which were gazetted under Fisheries Act of 1970, were placed under the administration of MPRU. Mnazi Bay Ruvuma Estuary Marine Park (MBREMP) and Tanga Coelacanth Marine Park (TACMP) were gazetted as the second and third Marine parks in 2000 and 2009 respectively. In addition to the existing reserves, ten (10) more reserves have been gazetted.

#### **Governance types**

MPAs management in Tanzania fall under IUCN category II &VI on Table 1 below:

TABLE 1: IUCN PROTECTED AREA CATEGORIES I-VI

CATEGORY	IUCN PROTECTED AREA MANAGEMENT CATEGORIES
1a	Area mainly managed for science, or as strict nature reserve
1b	Area managed mainly for wilderness protection Wilderness Area
II	Area managed mainly for ecosystem protection /recreation
III	Area managed mainly for conservation of specific natural features often called a national Monument
IV	Area managed mainly for conservation through management intervention e.g. habitat management areas
V	Area managed mainly for land /Seascape conservation and recreation and active management assigned, as with Protected Landscapes.
VI	Area managed mainly for Sustainable use of Natural Ecosystem e.g. multiple use protected area

**Note:** Category II constitutes the Marine Reserves where harvesting of resources is not allowed while Category VI are the Marine Parks where the communities are allowed to reside and resources can be utilized through zoning plans.

#### **Key Threats**

- i. Environmental degradation localized pollution
- ii. Destructive resource use
- iii. Resource use conflicts
- iv. Climate change
- v. Uncontrolled tourism development

#### **Barriers for effective implementation**

Typical barriers for effective implementation of activities in MPAs include, lack of financial resources to gazette more MPAs so as to reach the targeted national area size of 10% by 2020

as per **Target 11 of the Aichi Targets**. Also human resource considering the expanding protected areas and equipment such as patrol boats.

Other barriers include developmental activities such as oil and gas mining, construction of harbors and modification of beaches for construction of hotels.

#### **Timeline for completing Key actions**

ACTION	TIME (Years)												
	2012	2013	2014	2015	2016	2017	2018	2019	2020				
Control of Environmental degradation specifically localized pollution in MPAs													
Control of destructive resource uses by undertaking biophysical studies to increase the current area covered by MPAs i.e. from 6.5% (2011) to 10% by 2020.													
Control of Tourism development activities along the coastal areas of MPAs													

Reduction of resource use conflicts e.g. undertaking socioeconomic studies to establish route and cause of conflicts in MPAs					
Addressing emerging issues such as Climate Change and its implication on MPAs management					
Monitoring and Evaluation					

Action Plans for completing priority actions of the programme of Work on Protected areas

# Action 1: Control of Environmental degradation specifically the localized pollution in MPAs

Key steps	Timel	ine (yea	ars)			Responsible parties	Indicative budget (USD)		
	2012	2013	2014	2015	2016	2017	2018		
Engage relevant consultants to undertake pollution studies in and around MPAs and develop corresponding mitigation/ management plans								MPRU, IMS, TAFIRI, NEMC, DOE	120,000

Develop Guidelines for effective control of pollution within and on the vicinity of MPAs				MPRU, IMS, TAFIRI, NEMC, DOE	80,000
Implement Guidelines				MPRU, MLFD	32,000

#### **Action 2 Control destructive Resource Use**

Key steps	YEAR 1&2  Responsible parties (USD)	budget
	MONTHS	
	2 4 6 8 10 12 14 16 18 20 22 24	

Undertake biophysical studies to increase the current area covered by MPAs i.e. from 6.5% (2011) to 10% by 2020.							MPRU, IMS, TAFIRI, NEMC, DOE	87,000
- On the basis of Biophysical data/information, gazette more reserves in both marine and fresh water body systems — Develop GMP from each gazetted MPA by holding consultative meetings from village (community) to national levels (technical) as per Marine Parks and Reserves Act 29, 1994							MPRU, MLFD	65,000
Conduct baseline research and monitoring programs of biodiversity and other resources in current 3 Marine Parks and 15 marine reserves.							MPRU, MLFD	220,000

#### **Action 3: Resource Use Conflicts**

Key steps	YEAR 1&2	Responsible parties	Indicative budget (USD)
	MONTHS		

	2	4	6	8	10	12	14	16	18	20	22	24		
Engage experts to collect socio-economic information on resource use patterns in MPAs													MPRU, IMS, TAFIRI, NEMC, DoE	75,000
Assess roots and causes of conflicts in MPAs.													MPRU, MLFD	65,000
Develop and implement sustainable mechanisms for resolving conflicts between MPAs Management and Stakeholders													MPRU, MLFD	120,000

# Action 4: Addressing the impact of climatic change

Key steps	YEAR 1&2	Responsible parties	Indicative budget (USD)

						M	ONTH	IS						
	2	4	6	8	10	12	14	16	18	20	22	24		
Assess the impact of Climatic Changes on ecosystem and environment in MPA													MPRU, MLFD, IMS IRA, WWF, etc	150,000
Develop specific Management Plans for mitigating impacts of climatic changes in Tanzania MPAs													MPRU, MLFD, IMS IRA, WWF, etc	70,000

### **Action 5: Uncontrolled Tourism Development**

	Responsible parties	Indicative budget								
			(USD)							
2012	2013	2014	2015	2016	2017	2018	2019	2020		

Assess tourism carrying capacity in all MPAs					MPRU, IMS, TAFIRI, NEMC, DOE	81,000
Develop Tourism Products Marketing Strategy					MPRU, MLFD	67,000
Train MPRU staff in Tourism marketing					MPRU	45,000
Assess MPRU revenue base and develop strategy for improvement					MPRU, MLFD	32,000

## Action 6: Monitoring and Evaluation of programme activities

Key steps								Responsibl e parties	Indicative budget (USD)		
					YEAR	S					
	2012	2013	2014	2015	2016	2017	2018	2019	2020		

Conduct Expert workshop to identify key indicators that will be used to measure performance, Impact, and outcome at the end of the programme					MPRU, IMS, TAFIRI, NEMC, DOE	80,000
Develop Monitoring and Evaluation Plan for the Programme					MPRU, MLFD	23,000
Built capacity for MPRU staff on M&E					MPRU	50,000
Improve MPRU data base for the storage of information and Data collected during programme implementation and thereafter					MPRU, MLFD	150,000
TOTAL (ACTION 1-6)						1,612,600

# NATIONAL PROFILE ON THE IMPLEMENTATION OF THE PROGRAMME OF WORK ON PROTECTED AREAS

The draft reporting framework facilitates capturing the progress in completing assessments on 13 key goals of the programme of work on protected areas and specific actions taken to implement the results of those assessments, in order to indicate the status of implementation. Progress in completing these assessments is measured from 0-4 (0- no progress; 1- planning phase; 2- initial progress; 3- substantial progress; 4- nearly or fully completed). The framework allows Parties to append the results of these assessments, and to optionally describe applicable, the letters N/A should be entered. The PoWPA focal points could upload the information on the CBD website as and when they undertaken and completed the assessment or following the

	orting cycle of national reporting through a user ID and	d password
