DANAPURE Wetland, Liceo Taller San Miguel-Colombia

A Very Special Celebration

For our school the celebration of Wetland Day is very important because it honours our DANAPURE. For several days our youngsters have partaken in different activities, such as reforestation with indigenous Colombian bamboo species that protect our water sources. Furthermore, we have held drawing contests as well as expositions with the materials we received from WLI. Also, 43 children participated in the design of the logo for the 2015 Wetland For Our Future campaign.

We finished the first stage of our Butterfly Garden ALAS and hope to finish this site in the first months of 2016. With the help of local media and wetland organizations we are calling on all young people in Colombia to participate in a photography contest. We hope to receive a lot of participants.
