

Programme of work on Article 8(j) and other provisions of the Convention on Biological Diversity related to indigenous peoples and local communities to 2030

Adopted by the 16th meeting of the Conference of the Parties to the Convention on Biological Diversity (decision 16/4)

I. Objective

1. The objective of the present programme of work is to promote, within the scope and in line with the objectives of the Convention on Biological Diversity, the implementation of Article 8(j) and other provisions of the Convention related to indigenous peoples and local communities, as well as the Kunming-Montreal Global Biodiversity Framework, at the local, national, subregional, regional and international levels, and to ensure the full and effective participation of indigenous peoples and local communities at all stages and levels of their implementation, thereby ensuring an ongoing recognition of the close association that indigenous peoples and local communities have with biological diversity and the Convention and its Protocols.

II. General principles

2. The full, equitable, inclusive, effective and gender-responsive participation of indigenous peoples and local communities, in particular women, girls and youth among them, should be ensured, from the local to the global level, at all stages of the identification, implementation and monitoring of the elements of the programme of work. Partnerships with indigenous peoples and local communities should be ethical, equitable and based on mutual respect and good faith.

3. The programme of work is aimed at addressing the specific challenges faced by indigenous peoples and local communities, in particular in developing countries, and the need to ensure the appropriate and regionally balanced representation of indigenous peoples and local communities in the work of the Convention.

4. The programme of work is also aimed at promoting the implementation of Article 8(j) and other provisions of the Convention related to indigenous peoples and local communities, taking into account the specific challenges faced by developing country Parties in promoting that implementation.

5. The traditional knowledge, innovations, practices and technologies of indigenous peoples and local communities should be valued, considered essential and given the same respect and consideration as other forms of knowledge. Genuine collaborations and the co-production of knowledge in ways that respect the knowledge-generation processes and the integrity of each knowledge system should be promoted. The inclusion of knowledge from diverse systems and practices should be mainstreamed into the development and implementation of policies on biodiversity conservation, sustainable use and benefit-sharing.

6. A holistic approach consistent with the spiritual and cultural values and customary practices of indigenous peoples and local communities should be adopted, recognizing all of their relations, including to their territories, lands and resources, as well as their rights, in accordance with relevant national legislation and international instruments, to have control over their traditional knowledge, innovations, practices and technologies.

7. The ecosystem approach is a strategy for the integrated management of land, water and living resources that promotes conservation and sustainable use in an equitable manner.

8. The traditional knowledge, innovations, practices and technologies of indigenous peoples and local communities should only be accessed with their free, prior and informed consent, in accordance with national legislation and relevant international obligations. Indigenous peoples and local communities should receive, in a fair and equitable way, the benefits from the use of the traditional knowledge associated with genetic resources that they hold.

9. The implementation of the programme of work should follow a gender-responsive approach, the Gender Plan of Action (2023–2030) and a human rights-based approach respecting, protecting, promoting and fulfilling human rights. The Framework contains an acknowledgment of the human right to a clean, healthy and sustainable environment and a commitment to ensuring access to justice and information and the full protection of environmental human rights defenders. Nothing in the present programme of work may be construed as diminishing or extinguishing the rights that indigenous peoples currently have or may acquire in future, as also stated in the United Nations Declaration on the Rights of Indigenous Peoples.
